

SECURE EPHEMERAL COMMUNICATIONS FOR INCIDENT RESPONSE

Effective incident response (IR) requires tight security and control over the communication channel used for investigation and sharing of threat intelligence. Directing all information sharing to an out-of-band secure ephemeral platform is a must.

Wickr enables teams to enforce *multi-level ephemerality* for different stages of response and quickly add critical team members — inside and outside the company — to ensure that information transmitted during IR is not accessible beyond its useful life and intended recipients.

WICKR IN INCIDENT RESPONSE: SECURE // EPHEMERAL // ACCESSIBLE

Wickr Pro is a secure communications platform for IR collaboration that requires the confidence and security of a face-to-face conversation.

Built with the world's most advanced multilayered security and persistent ephemerality™, Wickr Pro enables security teams to have full control over sensitive intelligence to know exactly who has access to it and how long it lives.

Wickr Pro accelerates communication during incident response by empowering IR professionals to deploy full-feature, multi-platform secure private networks in minutes.

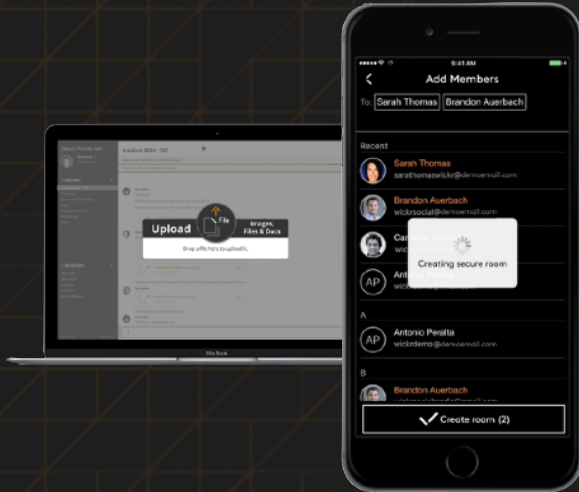

With Wickr, IR teams can communicate 1:1, manage secure rooms for different stages of response, and share files of all relevant types. As always on Wickr, you can set the expiration and 'burn-on-read' time on any message, or file.

BEST PRACTICES FOR SECURE EPHEMERAL COMMUNICATIONS IN INCIDENT RESPONSE

- ✓ **Deployment:** To avoid using multiple ad hoc tools across IR efforts, have a standard protocol so everyone on your team, including outside experts, knows that Wickr is a go-to channel during IR, and is on-boarded in advance.
- ✓ **Initial IR:** As soon as alerted, immediately direct all IR communications to an out-of-band channel to ensure the investigation is not discoverable by an adversary.
- ✓ **Provisioning:** Quickly add and verify new users to expedite the IR effort — security team members, legal, PR, and outside forensics experts.
- ✓ **Ephemerality:** Wickr allows for a multiple-level ephemerality for different phases of incident response. To ensure that no sensitive information is accessible beyond its useful life and intended recipients, set a precise expiration time on any conversation and file transfer.
- ✓ **Secure Groups:** Organize IR discussions and information sharing by creating secure rooms for different teams and response stages. Each room has its own administrator(s), permission levels, and ephemerality.
- ✓ **Collaboration:** Streamline your IR effort by sharing threat assessments, intelligence, and files of any size in one place — copy & paste text, drag & drop files. Message and place secure voice & video calls 1:1 and in secure groups on mobile and desktop.
- ✓ **Federation:** To share threat intelligence with industry partners, federate across corporate networks without compromising security or ephemerality.
- ✓ **IR Records:** While most working-level communications should never be stored for security purposes, some information must be maintained for the record. Consult with a legal team to determine what needs to be stored, set up the 'record-keeping' rooms with longer retention time, and add the required participants to that room ahead of time.

WICKR PRO FOR INCIDENT RESPONSE

With today's state of end-point security, it is essential to run incident response on a vetted secure channel, minimizing a chance for discovery by an adversary.

Wickr Pro is built as a hardened security environment to mitigate these risks, mirroring the expectations of a face-to-face meeting among trusted parties.

WICKR PRO CAPABILITIES

ADVANCED LAYERED SECURITY
NO THIRD PARTY INCLUDING WICKR CAN ACCESS USER MESSAGES

MULTI-LEVEL PERSISTENT EPHEMERALITY
MESSAGES ARE NOT ACCESSIBLE BEYOND SET EXPIRATION OR BURN-ON-READ TIME

PERFECT FORWARD & BACKWARD SECRECY
NEW KEY GENERATED FOR EVERY MESSAGE

PROVISIONING & ADMIN CONTROLS
EASY ON-BOARDING // SECURE PRIVATE NETWORK DEPLOYMENT IN MINUTES

NETWORK FEDERATION
USERS CAN SECURELY COMMUNICATE ACROSS WICKR NETWORKS & APPS

SECURE ROOMS
CLIENT-BASED GROUP MANAGEMENT PROTOCOL FOR LARGE TEAMS

FILE TRANSFER
END-TO-END ENCRYPTED EPHEMERAL FILES UP TO 5GB

VOICE/VIDEO
END-TO-END ENCRYPTED CALLS & VIDEO CONFERENCE
